6	Results	9
7	Conclusion	10

1 Introduction

2 Foundation

2.1 Preferred Observations Underwrite Existence

2.2 The Perception-Action-Cycle

2.3 The Partially Observable Markov Decision Process as a Model for Planning

2.4 Minimizing Variational Free Energy Enables Inference

3 Lagrangian (Active) Inference

3.1 Constrained Forney Factor Graphs as Substrates for Inference

3.2 The Lagrangian of the Variational Free Energy Functional

3.3 Deriving Message Passing Algorithms

4 Models

4.1 The BFE Agent

4.2 The GFE Agent

4.3 The Context BFE Agent

4.4 The Context GFE Agent

5 Simulation Setup

6 Results

7 Conclusion
