

The following page is to be included in the master thesis

Agreement of the parties on the use of artificial intelligence in creating content:

The following points must be discussed between the supervisor(s) and the student before commencing work. The supervisor(s) make(s) the final decision on what is permitted. Please check all that apply. Use the comments field to add or specify points. Supervisors may cross out lines to indicate that using AI is not permitted for these items.

- ☒ Linguistic editing and/or language revision
- ☐ Creation of the initial outline
- ☒ Formulation of the abstract
- ☐ Revision of the logical structure
- ☐ Drafting an initial version of the introduction
- ☐ Drafting an initial version of the methods section
- ☐ Drafting an initial version of the results section
- ☐ Drafting an initial version of the discussion
- ☐ Interpretation of the results
- ☐ Other:

1. Declaration of the supervisor:

The supervisor hereby confirms that he/she takes full responsibility for the supervision of the student throughout the entire master thesis.

Date 27.02.2026 Signature of supervisor (1st examiner) 

2. Declaration of the student

I hereby declare that I have not finally failed an examination nor lost the entitlement to take examinations in the M.Sc. Neuroscience at the University of Freiburg or in a comparable or related program with similar content. I further declare that I am not in an ongoing examination procedure at another university in a M.Sc. Neuroscience course or in a comparable or related program with similar content.

Date 15.02.2026 Signature of student 

Optional

Date Signature of 2nd examiner

The master thesis was admitted by the examination panel.

The master thesis starts on
and must be finalized by: *See HISinOne*

Date Signature of (co-)chair examination panel

Requirements for admission to the master thesis (PO 2021)

- The student is enrolled in the M.Sc. Neuroscience programme
- The student has successfully accomplished the modules Foundations of Neuroscience, Methods in Neuroscience, Research Project 1, and Research Project 2
